QUALITY RESULTS FOR FOOD & FEED SAFETY

Central Testing Laboratory Ltd. has provided reliable lab services and results to the food and feed industry for over 90 years. Our area of expertise is agriculture, we analyze a diverse mix of samples, such as; Grain, Forage, Ration, Oil seeds and Supplements, Food samples such as; Dairy products, Meat & Fish products, Bread and Water samples.

Core Values:

- Delivering value to our customers along with satisfaction
- Continuous improvement to achieve efficiency and accuracy
- Maintaining safety, internal controls and employee involvement to reinforce standard operating procedures

Analyze feed and water samples to ensure animal health

Achieve by testing feed samples to maximize livestock production

Advance by formulating a proper feeding program

We pride ourselves on maintaining a turn around time of 3 – 5 working days for routine analysis. Upon completion, results will be available online, by fax, or email. An original of the

Laboratory Analysis Reports will follow by mail if requested.
